

ABC LABORATORIES

ABC Laboratories (ABC Labs) is a Level 1 BBBEE compliant company, offering testing facilities to mining companies, local municipality and individual companies seeking to test their products for compliancy approval.

The company is a certified testing facility for minerals, liquids and solids from industries, mines, local municipalities as well as firms within the Ga-Segonyane, Gamagara, Tsantsabane and the broader Northern Cape Province.

ABC Labs is in the process of acquiring the internationally recognized International Standards Organisation (ISO 17025) accreditation.

In the meantime they still provide testing facilities for mining houses which want to determine the quality of their manganese. Iron ore, lime, cement as well water quality.

Amongst the nature of tests conducted, they offer testing laboratories (TL), loss on ignition (LOI), total moisture percentage (%), trace elements on soil analysis (XRF Analysis), chemical testing on water analysis (ICP Analysis), flame resistant geological samples, bulk and in-situ density analysis and the ph conductivity testing.

They deliver results in record time, in order to reduce loss of man hours caused by prolonged results producing time hence ensuring the productivity of firms in the long term.

The future looks brighter under the microscope for ABC LABS as more companies start to conduct experiments using their apparatus and laboratories for scientific tests.
